Requirements

Description

- The **JobLinks** system makes job searching easier by generating various search Links for a selected Company, Title, Occupation, Skill or Location.

Websites

- Websites are currently hard-coded.
- Websites are currently hard-coded for **Louisville, KY** where applicable.
- Websites can accomplish various types of searches, for example:
 - "Search for jobs at Adecco using CareerBuilder"
 - "Search for people working at Adecco using LinkedIn"
 - "Search for Data Analyst positions in Louisville, KY"
 - See **User Stories** for other examples.
- ~~A List of Websites is available (such as CareerBuilder.com, SimplyHired.com, Monster.com, etc.~~
- ~~Websites are not currently maintainable by the User.~~
- ~~The Website "Before" version is a "model" of the format, containing replaceable parameters.~~
- ~~The Website "After" version is created by dynamically replacing the appropriate parameters each time the User chooses a Company or other "item".~~
- ~~Websites addresses and their formats ("before" and "after") can be viewed by the User.~~

Companies

- A Company List is available to select for processing.

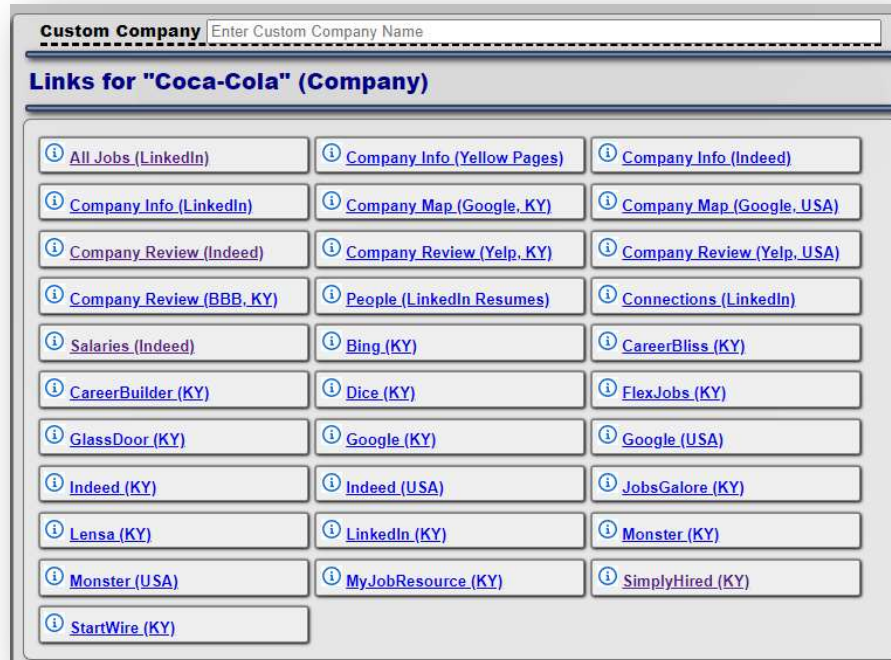

- The Company List can be scrolled when there are many items.
- The Company List uses a visual Progress Bar to indicate scrolling progress.
- PENDING** - Companies can be searched.
- Ad hoc Companies can be entered for searching **(update screen shot above)**.

Skills, Locations and other items, not listed here, at present.

Links

- Links are generated based on the Company or other “item” selected by the User. The **Links** shown below are examples and may change in subsequent versions or User customization.

- Users can right-click on Links to open them in another Tab with or without going there (depending on the browser). Default is to open in another Tab and go there.
- Users can right-click on Links to open them in another Window with or without going there (depending on the browser).
- Users can view the “before” and “after” Website Address by moving the mouse over the “i” icon.

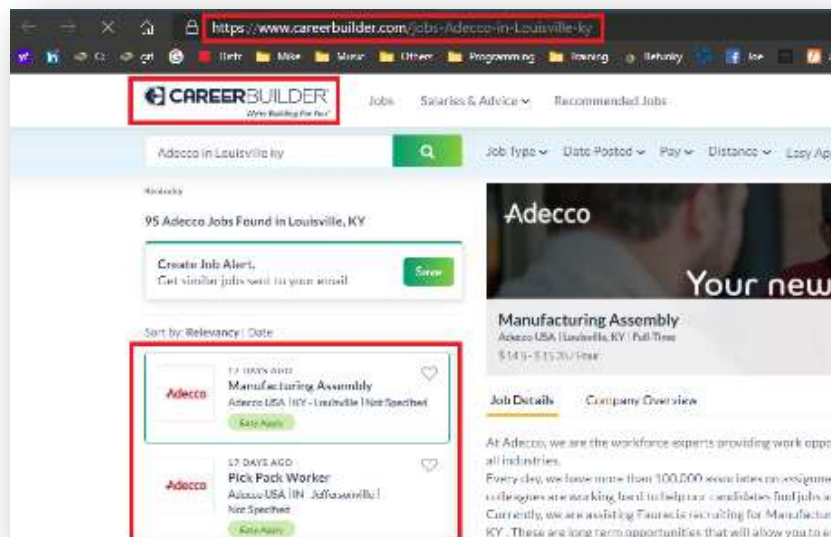

User Stories

Case Study 1 – Research Company Jobs

- **User** => “I want to search for jobs at **Adecco** in **Kentucky** using **CareerBuilder**”.
- **User** => Selects “**Adecco**” from the **Companies** List (**NOTE**: This step is shown only once because the screens are similar).
- **JobLinks** => Presents list of Links (**NOTE**: This step is shown only once because the screens are similar. For other Case Studies, refer to **Case Study 1**).

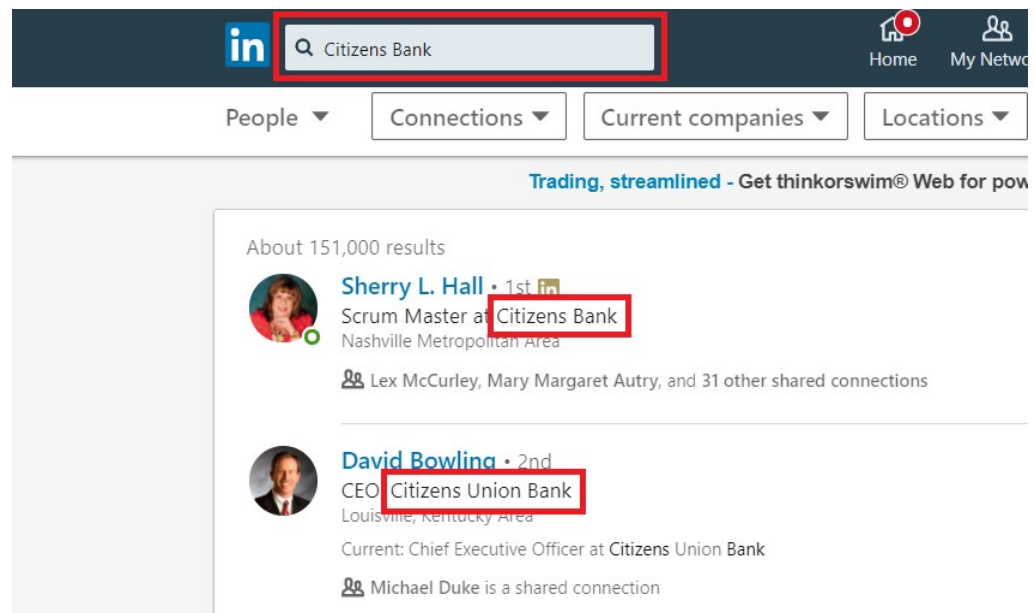

- **User** => Clicks on “**CareerBuilder (KY)**” Link.
- **JobLinks** => Opens appropriate website (**results will vary depending on jobs available at the time of your request**).

- **User** => May optionally opens other similar Links to perform a search (ex: “Search for jobs at Adecco using CareerBuilder” or “Search for people working at Adecco using LinkedIn”)

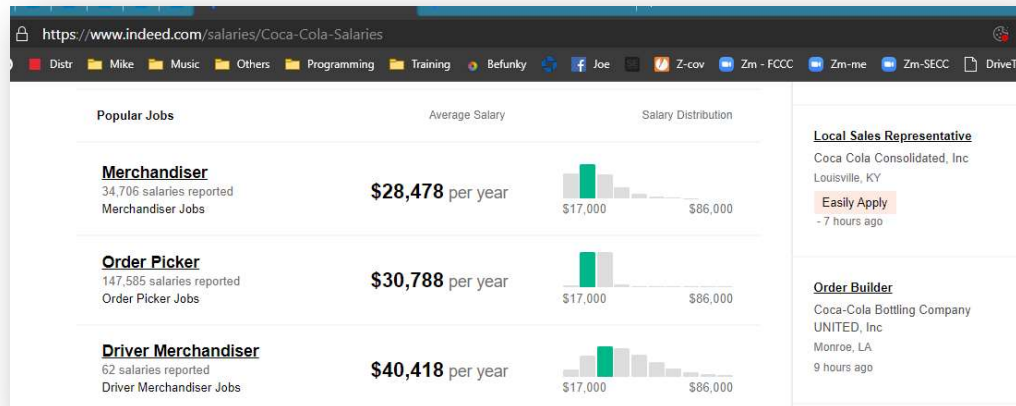

Case Study 2 – Research Company Contacts

- **User** => “I want to search for **My LinkedIn Contacts** working at **Citizens Bank**”.
- **User** => Selects “**Citizens Bank**” from the **Companies** List (*not shown*).
- **JobLinks** => Presents list of Links (*not shown*).
- **User** => Clicks on “**Connections (LinkedIn)**” Link.
- **JobLinks** => Opens appropriate website (*results will vary depending on the Company chosen, your LinkedIn profile, your own personal LinkedIn connections and data available at the time of your request*).

Case Study 3 – Research Company Salaries

- **User** => “I want to see **Salaries** for popular jobs at **Coca-Cola**”.
- **User** => User selects “**Coca-Cola**” from the **Companies** List.
- **JobLinks** => Presents list of Links (*not shown*).
- **User** => Clicks on “**Salaries (Indeed)**” Link (*not shown*).
- **JobLinks** => Opens appropriate website (*results will vary depending on Company chosen and salary data available at the time of your request*).

General Usage

- User wants to research a Company, search for networking contacts, apply for jobs, etc.
- User starts the **JobLinks** website and clicks on the **Search Companies** button.
- User clicks on an item in the **Company List** by clicking on it.
- Various Links are generated for the selected Company (one for each Website).
- User Clicks on the appropriate Links to view information about the Company, jobs, networking contacts, etc.
- Program displays list of Generated Links for the selected Company (one for each Website).

Researching a Company

- User wants to research a Company.
- User starts the **JobLinks** website and clicks on the **Search Companies** button.
- User clicks on an item in the **Company List** by clicking on it.
- Various Links are generated for the selected Company (one for each Website), including Links for researching a Company.
- User Clicks on the appropriate Links to view the research about the Company.

Researching Multiple Companies

- At present, the User cannot select more than one Company at a time, however, the User can open any number of Companies, one after another, to process multiple Companies.

History

- 09/28/2020 (v01, 2 pages) Began **JobLinks** documentation.
- 10/01/2020 (v02, 3 pages) Updated with recent **JobLinks** website changes; added images.
- 11/03/2020 (v03, 8 pages) Updated User Stories with images.
